

JOIN US APRIL 17TH
FOR A SPECIAL SIERRA CLUB PROGRAM

PROTECTING OUR **WATER, AIR AND CLIMATE** IN THE CURRENT POLITICAL ERA

Join us for a special program on national, regional and local environmental issues, and how environmental groups work together toward a more sustainable future. Our featured speaker is Glen Besa. Glen Besa is the immediate former director of the Sierra Club Virginia Chapter. In his twenty years with the Sierra Club, he worked on issues as diverse as forest protection and toxics. Most recently, Glen and the Sierra Club have been focused on climate and energy issues. From coal ash pollution at the Chesapeake and Yorktown coal plants to a new solar farm proposed for Gloucester County to sea level rise caused by climate change, these are all energy issues that Glen continues to work on in retirement.
