

Wendell and Penelope's GUIDE TO FOG

askHRgreen.org

**Hi! We're Wendell and Penelope and
we're here to tell you about FOG:
fats, oils, and grease.**

**It's important to
keep FOG out of your
drains and toilets.**

Here are some sources of FOG you might find in your kitchen.

Bacon Grease

Butter

Mayo

Cooking Oil

Gravy

Salad Dressing

Milk and Cream

Peanut Butter

Pan Drippings

FOG should go in the garbage instead of down the drain. Liquids like used cooking oil should be put in a can or jar first.

**Do you know where
your drains lead?**

**The drains in
your home lead
to a big system
of pipes and
eventually to
the sewer.**

**When FOG gets
in that system
of pipes, it stays
separate from
the wastewater
because oil and
water don't mix.**

Fats, oils, and grease are sticky. They stick to each other and to the sides of pipes. Your pipes can get clogged up with FOG if they go down the drain.

Once FOG gets into the sewer, it can even form giant fatbergs that collect garbage and dirt. YUCK!

Fog in the air clouds your vision, making it hard to see. FOG in the sewer clogs pipes, making it hard for water to move.

Can you find all the sources of FOG in this fridge?

Here are some other things that you should never put in your toilets and drains.

Medications

Chemicals

Paint and Paint Thinners

Wipes (even the “flushable” ones)

**Can you get through this maze of sewer pipes?
Don't touch the fatbergs!**

**Thanks for reading, and remember:
Don't Make a Splash-
Put FOG in the Trash!**
